## Compounding Package

The Compounding Package is one of the most rewarding and exciting investment plans offered by Bitsgrowers. It is designed for long-term investors who want to maximize their returns. Under this plan, the investor's capital works even harder, generating double the profit of the initial investment amount every month. In simple terms, whatever amount an investor commits to the compounding package is multiplied by two on a monthly basis.

- Direct Compounding Package – This option allows investors to enter directly into the compounding plan without first going through the normal investment cycles. It is ideal for those who prefer to fast-track their investment growth.
- Indirect Compounding Package – In this option, the investor first completes the regular investment cycles, after which they can choose to reinvest by doubling the entire accumulated funds into the compounding plan. This pathway rewards patience and consistency.

**Note:** The minimum capital required for the compounding package is \$10,000, and the investment duration is 3 months.
